Our corporate sponsors show our members and our community that their organization is dedicated to supporting children and adults with complex communication impairments who use AAC to actively participate at school, at work, at home and in the community.

The LET'S TALK Communication Access Initiative is a 501(c)3 Colorado Non-Profit Organization founded in 2016. Our mission is to support "communication access for all" by supporting children and adults with limited to no verbal speech to actively participate in their lives at home, at school, at work and in the community via Augmentative and Alternative Communication (AAC) systems.

In addition, the Let's Talk Communication Access Initiative provides multiple educational opportunities to support our community's understanding of disabilities and how individuals with complex needs have many abilities. Our goals are to build meaningful relationships, to support inclusive participation and to grow our community's awareness of how AAC systems support our neighbors, friends and family to engage, learn and grow.
